EDUCATION

Australian National University

Doctor of Philosophy in Economics 2019–2026

Committee: [Sephora Mangin](#), [John Stachurski](#), [Fedor Iskhakov](#)

Job Market Paper: “*Asset Price Dispersion, Monetary Policy and Macroprudential Regulation*”

Graduate Coursework: University of Oxford 2020

Bachelor of Actuarial Studies/Bachelor of Economics (Honours) 2012–2017

Supervisor: [John Stachurski](#)

Summer School: London School of Economics 2014

WORK EXPERIENCE

QuantEcon — Research Assistant/Developer 2018–2026

- Collaborated directly with Thomas J. Sargent (2011 Nobel Laureate in Economics) and John Stachurski, developing modules for the open-source [quantecon.py](#) library — computational tools for dynamic programming and stochastic modelling used by researchers and institutions (incl. FRBNY, IMF) and adopted across leading graduate economics programs globally
- Acknowledged by name in all three textbooks by Stachurski and Sargent — *Dynamic Programming I & II* and *Economic Networks* — for contributing to and reviewing their technical content
- Helped create the online lecture material for the *Quantitative Economics with Python* lecture series, contributing executable lecture notebooks hosted by QuantEcon

Australian National University — Associate Lecturer 2019–2023

- Designed and delivered 17 graduate courses across advanced macroeconomic theory, advanced econometric theory, computational economics, and financial economics to 3000+ students over four years
- Visiting Lecturer at Sungkyunkwan University and Peking University HSBC Business School
- Nominated for the ANU College of Business and Economics Award for Excellence in Teaching (2021); Average SELT score of 4.9/5

Australian Government, The Treasury — Policy Analyst 2018

- Built a forecasting model in R and Excel to predict the budget impact of company loss tax offsets across a AUD \$90+ billion revenue stream
- Partnered with the Productivity Commission to deliver strategic recommendations for implementing git-based version control systems across Treasury modeling frameworks to improve auditability

The Brattle Group — Research Analyst 2018

- Advised the ACCC on the Harper Review reforms, analysing new concerted practices prohibitions and misuse of market power provisions under the Competition and Consumer Act 2010
- Built a gas pipeline network model for the Australian Energy Regulator (AER) to track and analyse domestic gas flows, enhancing oversight of infrastructure capacity and market dynamics

OTHER PROFESSIONAL ACTIVITIES

Open-Source Project: [sparsepea.py](#) package for solving DSGE models with sparse grids 2025

Head Organiser, Income-Contingent Loans Research and Policy Contribution Conference ANU 2022

Co-founder/Investment Director, Australian National University Student Managed Fund 2016

President, Australian National University Commerce Collective (Now FMAA ANU) 2015

SCHOLARSHIPS AND GRANTS

Australian Government Research Training Program Full Stipend & Fee Offset Scholarships 2019–2023

Australian Research Council Discovery Project PhD Fellowship 2019–2023

Australian National University, Research School of Economics Research Grant and Travel Grant 2021–2022

SKILLS

Programming Languages: Python, Rust, R, Julia

Libraries & Frameworks: Numba, Jax, Tasmanian, TensorFlow, QuantEcon

Tools & Platforms: Git, Bash/Zsh, Jupyter, VS Code, Excel, $\text{\LaTeX}$, Markdown

Operating Systems: Ubuntu, Manjaro, Arch, macOS, Windows
